

SWING - A gorgeous design solution providing your draperies with a soft undulating, wave like, effect. The SWING uses a snap tape in conjunction with a standard snap or optional 2-part glider system that is being offered in various fullness degrees. The snaps and gliders are spaced by a small cord which is hidden in the track. Because of this fabrication the curtain hangs beautifully and evenly in an S-shaped, wave like fold even when closed. With the optional easy 2-part glider, you'll be able to attach the lower snap straight to the snap tape in your workroom, thus eliminating the tedious, oftentimes painful, and labor intense snapping of the curtain on the job site. This system provides for ease in cleaning and replacement of the curtain when necessary, as well as allowing for a second curtain to be snapped to either side of the glider snap. This then provides for the opportunity of a blackout curtain that can be separated from the regular curtain. Also, the lower part which snaps onto the tape can then be dry cleaned or laundered along with the drapery.

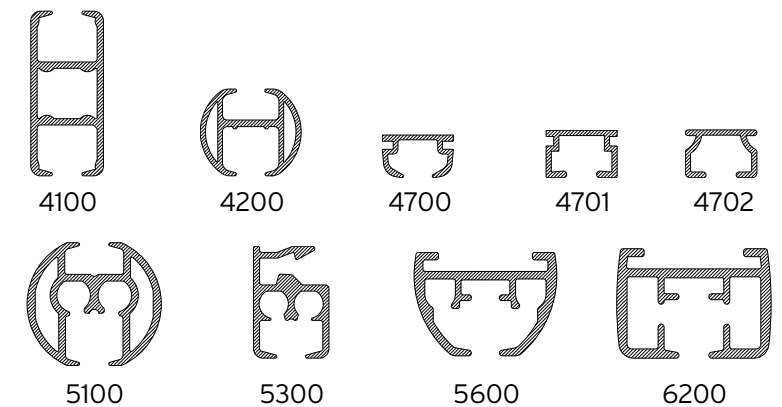

Specification guide

Accessories

There are two glider types available: 4014-10 and 4014-11. The click glider 4014-11 is suitable to click in and out of the track. Tape with snaps: 4014-20-108. Cord and electrically operated systems use a master with overlap right, master with overlap left or master without overlap (masters are optional for hand operated systems).

Mounting

Mount the center of the track min. 4 inches out of the wall. Using anodized track is not recommended. The gliders are suitable for the following profiles:

Fabrication

The hanging of the curtain with Swing depends on the selected fabric. Room height fabrics are optimal and preferred. For more technical information and details please also view the Swing fabrication guideline and calculation sheet.

PLEATING SYSTEM

Glider distance

Glider specifications

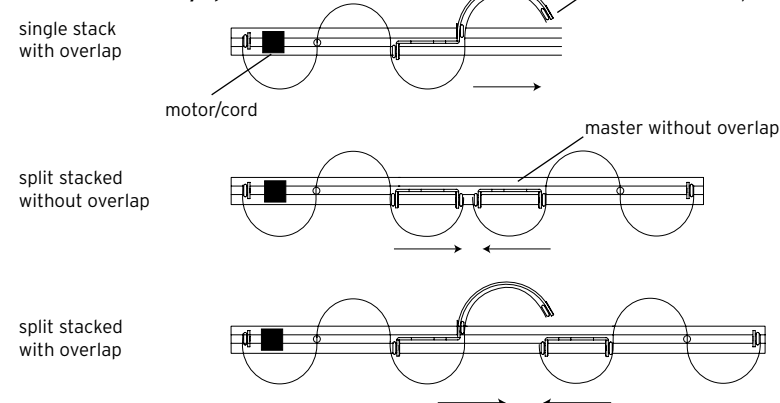

Glider	Load	Width of the curtain
4014-10 	- max. 1.1 lb per glider - max. curtain weight depends on drapery track system chosen	--Depends on drapery track system chosen
4014-11 	- max. 1.1 lb per glider - max. curtain weight depends on drapery track system chosen.	-depends on drapery track system chosen.

All specified dimensions may not exceed the maximum allowable weight of the chosen drapery track system.

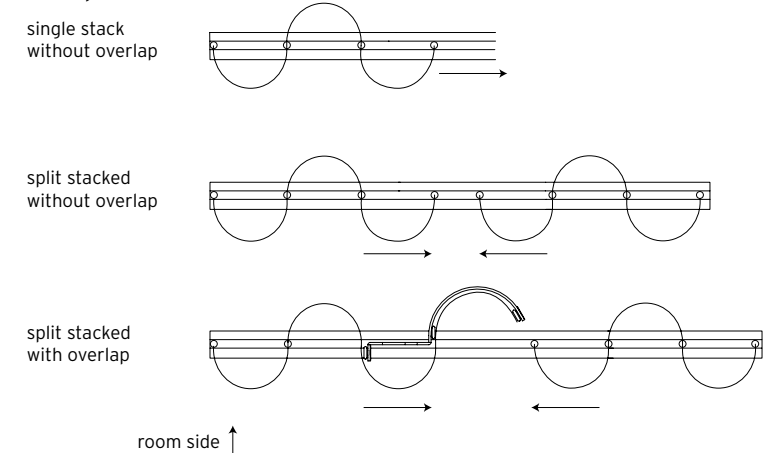

Example

The master with overlap always installs concave. In the case of a split stack this then ensures a nice overlap. The master without overlap always begins convex, and in either option the fabric will always end convex. In case of a cord or electrically operated system this will ensure that the motor-unit or cord remains hidden by the drapery.

cord and electrically operated

GLIDERS	
	4014-10-080 glider Swing (2-side) on cord colors: W
	4014-11-080 click glider Swing (2-side) on cord colors: W
TAPE	
	4014-20-108 tape with snaps colors: TR - W - ZW
MASTERS	
	6274-30SW-L master Swing complete with overlap left for 6200
	5674-10SW-L master Swing complete with overlap left for 5600
	5374-10SW-L master Swing complete with overlap left for 5300
	5174-10SW-L master Swing complete with overlap left for 5100
	4074-10SW-L master Swing complete with overlap left for hand operated (not 5600 and 6200)
	6074-10SW-L master Swing complete with overlap left for hand operated 5600 and 6200 colors: NM - W masters include pulley hook (except for hand operated)
	6274-30SW-R master Swing complete with overlap right for 6200
	5674-10SW-R master Swing complete with overlap right for 5600
	5374-10SW-R master Swing complete with overlap right for 5300
	5174-10SW-R master Swing complete with overlap right for 5100
	4074-10SW-R master Swing complete with overlap right for hand operated (not 5600 and 6200)
	6074-10SW-R master Swing complete with overlap right for hand operated 5600 and 6200 colors: NM - W masters include pulley hook (except for hand operated)
	6275-30SW master Swing without overlap for 6200
	5675-10SW master Swing without overlap for 5600
	5375-10SW master Swing without overlap for 5300
	5175-10SW master Swing without overlap for 5100 colors: NM - W masters include pulley hook (except for hand operated)
